

College Guide Checklist for Parents of:

Middle School Student

Community Outreach Resource Network

By: Yolanda Burse

- Talk about college and careers in a natural, casual way, without pushing specific schools.

- Pay attention to your child's courses, especially math. Push for honors or advanced courses if your child can handle the faster pace, but don't let your child get in over his head.

- Help your child improve her vocabulary by encouraging her to read for pleasure and modeling good reading habits.
